

POWDER SPRAY HEAD: RETAINING LIP ADJUSTMENT MADE EASY

User-friendly, simple, individual and reproducible height adjustment of retaining lips without changing the spray width.

Powder Spray Arm

In contrast to the previous version, where the height of the retaining lips was not adjustable, the new powder spray head features two independent retaining lip holders. Both the height and inclination of the retaining lips can be adjusted, without affecting the spray width.

ADVANTAGES OF THE NEW POWDER SPRAY HEAD

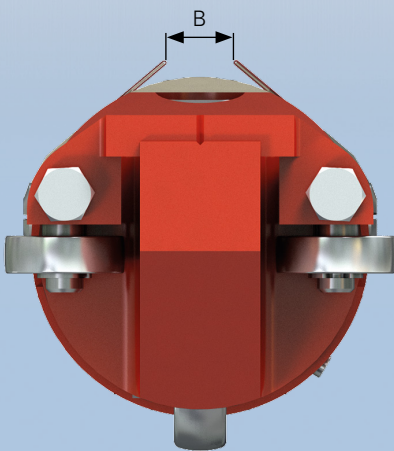

- Higher seam-coverage quality thanks to more precise coverage limitation
- Higher line efficiency thanks to less adjustment downtime
- Reproducible setting (e.g. after maintenance work)
- No spray width changes when changing position
- Quick changeover to other spray width sets

Retrofitting:

- Powder spray arms with «Cumulus» system can be retrofitted.
- An existing powder monitor can be mounted to the new powder spray head.

Standard spray widths:

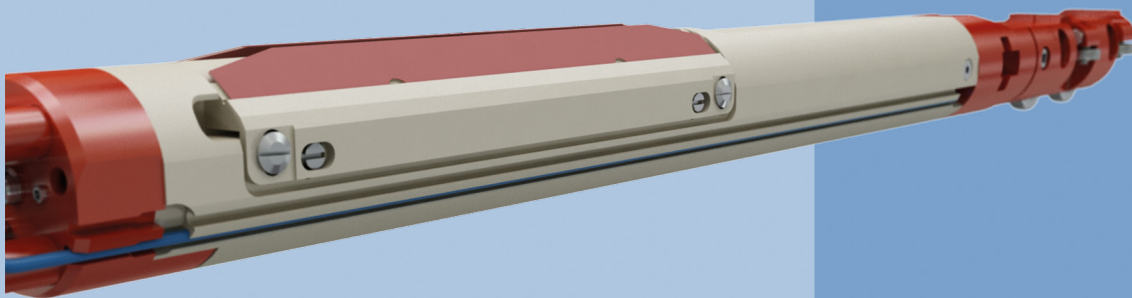

The following spray widths are available as standard for spray heads with sealing lips:

Standard spray widths «B»

6 mm
8 mm
10 mm
11 mm
12 mm
15 mm
18 mm

(Other spray widths on request)
