

DISCONTINUATION INFORMATION

PHASE III IMPORTANT

Upgrade from UNISOUD to PULSAR

UNISOUD
will be phased out
by June 2025

Upgrade to the
latest welding
current technology

Your welder model

VAA 20 | VAA-K / VAA 1000 series | VEAE-K / VEAU-K series | SMAG series | AFB / FBB series | FBB 400-5800 | ABM series | RWDA series | SBW series | MWM series | BWM series | VWDA series | PMB series | DMB series

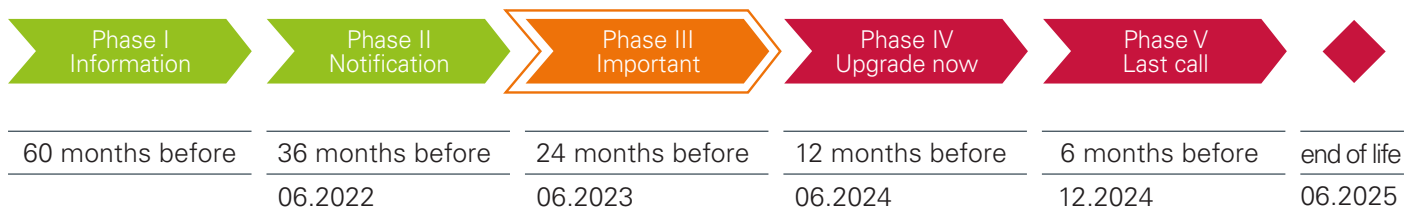

WHY UPGRADE?

Since its development by Soudronic in 1992, the pioneering achievement of the static UNISOUD welding current converter has been in reliable operation in more than 1,500 welders. Due to increasing difficulties in sourcing the electronic components, Soudronic will phase out the UNISOUD converter by June 2025.

With PULSAR, a technologically advanced product is available as suitable successor to UNISOUD. PULSAR incorporates state-of-the-art technology, and is a direct replacement.

CURRENT PHASE-OUT STATUS

PHASE III: WHAT DOES THIS MEAN FOR YOU?

- Any final orders for UNISOUD must be placed within the next 12 months.
- Prices can no longer be guaranteed.
- Repairs will still be executed.
- We strongly recommend allocating budgets for an upgrade to PULSAR to benefit from all advantages.
- UNISOUD will be phased out completely by 06.2025

ADVANTAGES OF THE NEW PULSAR?

Benefit today from all the advantages of the new PULSAR, the direct replacement.

- Interchangeability of components with welding machines of the latest generation
- Reduced spare parts inventory
- Less risk of wire break
- Digital communication (with UNICONTROL)
- Easier welding current range setting (with UNICONTROL)
- Improved contamination detection when using Pulsar with SWM-3 monitor, thus reducing roller head wear
- Operation and maintenance menu available in more than 20 languages
- Integrated help system (with UNICONTROL)
- Upgrade/installation takes approximately one working day

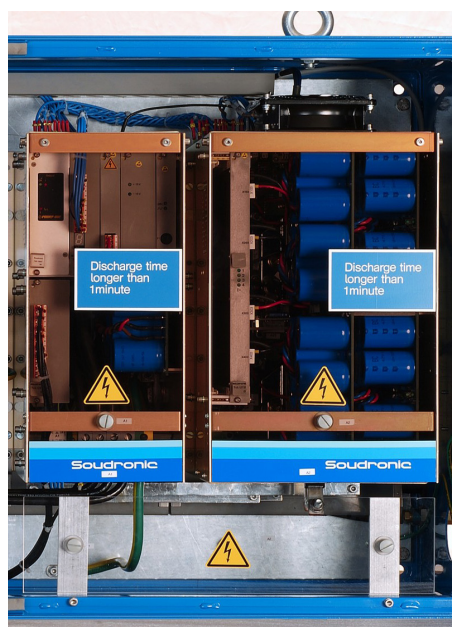

OPTIONS AVAILABLE

- SWM-3 Monitor
- Latest version of UNICONTROL (hardware and software) and menu available in more than 20 languages
- Remote Access package (with UNICONTROL)
- Industry 4.0 Readiness (with UNICONTROL)
